

solarcentury

## About this site

This site has been specifically designed to help you find out about solar energy and other renewable technologies. We want to accelerate the dissemination of information about energy efficiency and renewables and positively encourage you to read, copy and share all the information on this site.

The factual content is protected by a [Creative Commons](#) license, which allows you to utilise all the information on this site for non-commercial purposes, providing you credit the information with the word Solarcentury, which should be written as one word, with the first letter being upper case. [View our creative commons license.](#)

The graphical content of the Solarcentury website has been designed by [More Associates](#) using an [open source content management system](#) known as [eZpublish](#). Open source software is a great example of the benefits that can be achieved by openly sharing information.

The site is also compliant with the [W3C](#) web standards for CSS and XHTML, which ensure the code which makes up the site is free from errors and glitches. W3C compliant sites maximise accessibility, making them compatible with search engines, screen readers and other portable media (PDAs and mobile phones etc.). View our XHTML and CSS validation certificates.

Certain pages of this site (such as the blogs in the news section) have been enabled for RSS and XML to allow you to draw feeds to other websites, aggregators and desktop news clients. [Read our quick intro to RSS and XML.](#)

Lastly, your feedback is invaluable for helping us improve our service. If you find a bug or inaccuracy in any part of the site we'd love to hear from you via e-mail using the link below.

[Report any site problems here](#)

We hope you enjoy the site.
