SunPower SPR-205-BLK

The SunPower 205 Solar Panel provides a revolutionary combination of high efficiency and attractive, uniform appearance. Utilising 72 next generation SunPower all-back contact solar cells and an all-black backsheet, the SunPower 205 elegantly delivers an unprecedented total panel conversion efficiency of 16.5%. The panel's reduced voltage temperature coefficient and exceptional low-light performance attributes provide far higher energy delivery per peak power than conventional panels.

Features and Benefits

- High Efficiency - Industry leading panel efficiency of 16.5%
- Attractive Design - Unique design combines high efficiency and an elegant, all-black appearance
- More Power - Delivers up to 50% more power per unit area than conventional solar panels
- Reliable and Robust Design - Proven materials, tempered front glass, and a sturdy anodized frame allow panel to operate reliably in multiple mounting configurations
- Low voltage-temperature coefficient ensures maximum battery charging current is available even during high-temperature operation
- Exceptional low-light performance and high sensitivity to light across the entire solar spectrum maximises yearly charging performance in any weather
- Highest quality 3.2mm-thick high-transmission tempered glass provides enhanced stiffness and impact resistance
- Aerospace-style cell interconnects with in-place strain relief provide extremely high reliability
- Advanced EVA encapsulation system with multi-layer backsheet provides excellent long-term package durability
